

Zespół .NET nr 3

Miasto: Warszawa (preferowana praca zdalna)

Ilość osób: 9

Wiodące technologie i narzędzia: Umbraco platform, Javascript, .NET / C#, HTML, HTML5, CSS, GIT, Agile / SCRUM, VSTS + Slack experience, Valid MSDN account

Członkowie zespołu:

Back-end developer 1: 12 lat doświadczenia

Back-end developer 2 : 5 lat doświadczenia

Back-end developer 3 : 4 lata doświadczenia

Back-end developer 4 : 2 lata doświadczenia

Back-end developer 5 : 2 lata doświadczenia

Back-end developer 6 : 2 lata doświadczenia

Dodatkowo:

Front-end developer 1: 4 lata doświadczenia

Web Tester 1: rok doświadczenia

Web Tester 2: rok doświadczenia

Stawki:

1000-1200 zł netto za dzień pracy (stawka zależna od długości trwania projektu, od roli osoby w projekcie, etc.)

Co ich wyróżnia:

Osoby z zespołu mają doświadczenie w programowaniu .NET, we wdrażaniu rozwiązań w oparciu o Umbraco (jest dla nich to narzędzie, jeśli chodzi o rozwiązania CMS, które najczęściej wykorzystują). Co istotne, są to osoby pracujące w jednym zespole, osoby z jednej firmy.

To co ich wyróżnia to duża elastyczność, dająca możliwość rozpoczęcia/startu projektu bez szczególnych opóźnień, czekania na odpowiedni zespół (oczywiście w miarę domówienia terminu startu i obecnie toczących się projektów w naszym zespole). Większość ich realizacji to wykonywanie projektów w oparciu o technologię .NET – na tym obszarze są najbardziej skupieni i ten obszar im się najlepiej rozwija. Są też certyfikowanym partnerem Microsoft w tym obszarze (application development).

Doświadczenie:

Mobile

- Experience in Windows Phone programming (since the inception of the platform)
- iOS/Apple developers with experience since 2009 (since version iPhone 3)
- Android developers with experience since 2009 (since version 1.5)
- Experience with Windows CE – programming interfaces on PDA devices since 2008

.NET

- 10 years of experience (since .NET 1.1)
- Code standardization
- Automated application testing
- Solution testing services

Web

- 10 years of experience developing websites and web portals
- Browsers and platforms layout programming based on PSD format/Responsive CSS
- Content management
- Search Engine Optimization

B2B systems intergrations

- Application-level and data-level integration across departments, systems and office locations
- Standards used: Web Services, XML, ODBC, SQL, MDX, Java, C#
- We extend our expertise in systems integration since 2008

.NET & back-end:

Back-end

- ASP .NET
- C#, C++
- Visual Studio
- LINQ
- HTML (5), CSS (3)
- API (JSON, XML)
- WCF
- MS SQL, T-SQL
- Migrating data
- VCS - Git, SVN
- QA, testing, debugging
- Cloud and hosting (MS Azure)

Front-end

- HTML (5), CSS (3)
- JQuery, JavaScript frameworks/libraries
- MVC
- PSD
- Parallax and Responsive
- Web Services
- QA, testing
- UI, UX and design concepts, SEO

Web & CMS:

- Website based on Umbraco platform – back-end and front-end portal development based on Umbraco platform for leading Scandinavian IT Consulting/IT Outsourcing company (confidential), transfer Wordpress solution to Umbraco platform with CRM integration, MS Azure deployment with failover configuration
- Polish leading mobile payment provider B2C and B2B, back-end and front-end website development based on Umbraco platform, hosted and serviced on MS Azure
- Polish leading mother-baby web portal with more than 30000 users, back-end and front-end portal development based on Umbraco platform, hosted and serviced on MS Azure with CDN
- Polish leading navigation/GPS brand, back-end and front-end website development based on Umbraco platform, integration with licensing services, hosted on MS Azure
- Service/website for luxury apartment rentals located mostly on Caribbean Islands, they create whole website from the scratch on Umbraco platform, they were responsible for integration with external databases of available places for rent

Web Solutions / .NET & MVC

- Application for human resources management – for government client based in UAE (work as a subcontractor/confidential), system written from a scratch in MVC, hosted on-premise
- SharePoint Intranet – internal solution for corporate client from UAE (work as a subcontractor/confidential), custom controls written in MVC deployed on-premise
- Develop and design software in MVC for vehicle control stations, servers for data exchange, over 320 deployments in Poland (over 10% of vehicle expertise market)
- Software for fleet management integrated with desktop application for vehicle inspection (internal use)
- Web API interfaces – programming web services in MVC for mobile CRM application for leading truck dealer (team as a subcontractor end customer name confidential)
- TRUCK Web Software – project delivered in cooperation for leading Polish Car Fleet company (team as a subcontractor for end customer name confidential), mobile application for vehicle return evaluation with back-end written in MVC
